2. The application has been amended as follows:

In the Specification

In paragraph [0003] (page 2), line 4, add --, now abandoned-- after "2001".

In the Abstract

Please replace the abstract with:

--An apparatus for determining the validity of a data signal communicated between two microprocessors by a dual port RAM includes a sender for providing a data signal and an initialization status indicator and a dual port RAM in communication with the sender for receiving the data signal and the initialization status indicator. The RAM has a first location for storing the data signal and a second location for storing the initialization status indicator. The sender performs initialization on the RAM at the beginning of a data transfer cycle which includes a plurality of data transfer from the sender to a receiver. The sender updates the initialization status indicator as the initialization progresses. The receiver reads the initialization status of the RAM from the second

location and subsequently reads the data signal from the first location in association with the initialization status of the RAM.--

In the Claims

In claim 8, line 14, change "said initialization" to --an initialization--.

In claim 9, line 1, change "operation" to --initialization--.

Reasons for Allowance

The prior art of record does not teach or suggest the combination of limitations set forth in the independent claims.

It is noted that the related applications listed in section IV(A) of the IDS of 27 September 2001 have been reviewed. Those applications listed that are now patents have been added to the attached PTO-892.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
